

# Safe & Clean

DELIGARD Upholstery Fabrics

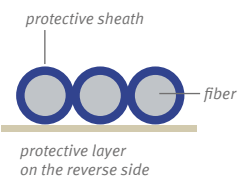

**DELIGARD upholstery fabrics: unrivaled in cleanliness and easy maintenance. Bacteria, dirt and moisture don't stand a chance with this patented innovative system. A vast array of combination possibilities is offered with beautiful designs on superior fabric qualities.**

## Sustainable cleanliness for heavy use areas

DELIUS upholstery fabrics which are equipped with the DELIGARD technology are exceptionally resistant to moisture and dirt. They are the solution for long-lasting stainless upholstery.

Each individual fiber is enclosed by a protective sheath, replacing the commonly used “shallow” surface coating found in other fabrics. The special layer on the reverse side prevents the penetration of moisture and wetness.

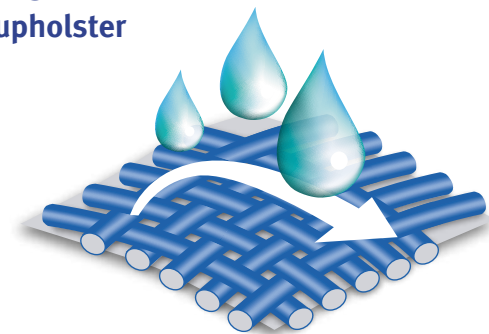

This innovative technology provides lasting protection against impurities and dirt and is easy to clean.

## Large selection of designs

Our exclusive jacquard and printed upholstery fabrics perfectly match the DELIUS furnishing fabrics. You will therefore always find harmonious fabric combinations which will create an atmosphere of well-being.

- **Resistant to moisture and dirt**
- **Easy cleaning**
- **Simple to upholster**

### Cleaning instructions for DELIGARD products:

- Treat spillages immediately.
- Remove overlying residues (e.g. food leftovers) with a soft bristle brush or cloth.
- In the case of dried stains, dampen with approx. 30°C warm water and add a few drops of liquid detergent to the soiled area.
- After a short soaking period, firmly brush or rub the affected area. Repeat two or three times if necessary.
- Finally rinse the affected area with luke warm water and dry the surface with a cotton cloth.

## DELIGARD

- is resistant to moisture and dirt
- is breathable
- prevents bacterial growth
- is water-repellent
- is resistant to urine
- is resistant to disinfectants
- is extremely wear-resistant
